### Premium

Premium drawers are sanded flat on the top side after assembly. All edges are slightly broken. The bottom made of 8 mm thick veneer board is grooved and glued on 4 sides. The joint spacing is fine and even. The drawers SE-40, SE-41 and SE-42 are supplied with semi-concealed dovetail joints. The front piece of the SE-46 internal drawer is tapped so that it can protrude to the side and conceal the runner.

### Eco

Eco drawers are produced similarly to decor drawers and are only available with dowelled corner joints. The drawers are already primed in the profile on both sides and are therefore not sanded flush after assembly. Due to tolerances, there may be a small offset between the front/rear piece and the sides. Eco drawers are only available in the wood types "Steamed beech" and "Oak character".
